Measurement Tips

For accuracy measure students wearing a leotard.
Girth is the most important measurement for accuracy of fit.

Measuring Guide

Measure **girth** from the center of a shoulder then down through the crotch and back up to the same shoulder.

Measure **bust** around the fullest part of the chest and the back.

Measuring **waist**. A waist is between the hip and bottom of the rib cage. It is the narrowest part of a torso, at or above the height of the belly button.

Measure **hips** around the widest part.

Measure **inseam** from the crotch to ankle bone in a straight line, on the inside of the leg.
